

# THE MyFloodStatus 5-STEP PROCESS

## Superior Data. Unparalleled Support.

MyFloodStatus' 5-step process is what makes our certified Flood Zone Determination Reports superiorly accurate, giving you the clarity and confidence you need to navigate flood regulation.

Structure-Based Determination

Preliminary Map Search

- 1 Beyond Geocoding**  
We employ parcel based information, delivering greater accuracy on property location than our competitors.
- 2 Attribute Verification**  
We proceed with certainty that we're performing a determination on the correct property.
- 3 Structure-Based Determination**  
Where does the structure sit in relation to the Special Flood Hazard Area? We'll show you.
- 4 Preliminary Map Search**  
Is there a new or proposed Preliminary FEMA map that will impact the flood status of this property, either positively or negatively? We'll provide it.
- 5 Quality Check and Confirmation**  
We perform a quality control check and confirm all official Flood Determination results.
